## Q&A

- Is Prism Light Pod safe and effective?
- Yes. Prism Light Pod uses non-invasive, non-fluorescent, non-UV rays, and non-infrared heat-based red LED technology.
- How many Light Pod sessions before I see results?
- Redness from skin and laser treatments is reduced in one session. We recommend 3 sessions per week for chronic pain, recovery from procedures, weight management and treating skin conditions.
- How much training and administration is required?
- There is no training required and the Prism Light Pod is automated and 100% unattended. There are six-optimized use-case settings. Clients lay comfortably for 15-minute sessions. The automatic timer turns the Prism Light Pod off at the end of each session and the receptionist wipes it down with a disinfectant wipe.
