## FAQ

- **Is Prism Light Pod safe?**
  - Yes, it is safe. There are no known health risks associated with red light therapy. Prism Light Pod is non-invasive and does not use fluorescent lights, UV rays or heat-based red LED technology
- **How does it work?**
  - Red light therapy delivers deep photo-cellular or mitochondria level healing. NASA first used red light therapy on astronauts in the 1970s. Prism Light Pod has pioneered & perfected whole-body photobiomodulation systems for resort spas worldwide
- **How much training and administration is required?**
  - Less than an hour of staff training is required because the Prism Light Pod is automated and 100% unattended. There are six-optimized use-case settings. Guests lie comfortably for 15-minute sessions that automatically times out and is easily cleaned with a disinfectant wipe.
