

PRISM LIGHT POD

Whole-Body Red Light Therapy

Prism Light Pod is the most advanced full-body red light system for performance recovery & reducing chronic pain.

Accelerate your body's natural healing process by 4-10 times faster.

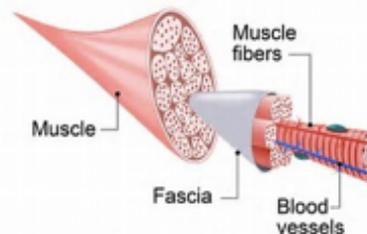

Six Optimized Settings for:

- Sports Recovery
- Chronic Pain Management
- Arthritis & Joint Pain
- Wound and Injury Healing
- Skin Conditions/Anti-Aging
- Weight-Loss

Accelerates Rehab & Recovery 4-10X

- Full-body light pod repairs your entire body within 15 minutes.
- Accelerate rehabilitation from injuries. Eliminate inflammation and chronic aches & pains.
- Safe, non-invasive, non-UV rays, non-florescent, non-infrared heat-based.

Most-Powerful & Energy-Efficient Red Light Pod

100 mW/cm² of red and near-infrared LEDS penetrate sore muscles, joints, deep tissues and nerves to relieve pain and stiffness, while reducing oxidative stress across your entire body.

Shrink unwanted fat cells and produce collagen to promote anti-aging

"Prism Light Therapy shortened my physical recovery by 4 weeks, I'm back on the field of play."

- Is Prism Light Pod safe and effective?
- Yes. Prism Light Pod uses non-invasive red LED technology that is non-fluorescent, non-UV rays, non-infrared heat-based. The National Institute of Health has published many articles on the benefits of red light therapy.
- How many Light Pod sessions are needed before seeing results?
- Patients have seen performance recovery and pain relief after several 15-minute sessions. We recommend weekly treatments for ongoing pain management.
- Are there any side effects from the Red Light Therapy?
- Patients will feel positive effects after one or more sessions. Studies show no negative side effects. However, positive impact from reduced stress, less fatigue, improved energy, weight-loss and fewer wrinkles were seen within patients. Results may vary based upon patient health and condition.
