

PRISM LIGHT POD

## Whole-Body Red Light Therapy

Prism Light Pod is the most advanced full-body red light system for performance recovery & reducing chronic pain.

Accelerate your body's natural healing process by 4-10 times faster.

Six Optimized Settings for:

- Sports Recovery
- Chronic Pain Management
- Arthritis & Joint Pain
- Wound & Injury Healing
- Skin Conditions/Anti-Aging Weight Loss

## Accelerates Rehab & Recovery 4-10x faster

- Full-body light pod repairs your entire body within 15 minutes.
- Accelerate rehabilitation from injuries. Eliminate inflammation and chronic aches and pains.
- Safe, non-invasive, non-UV rays, non-florescent, non-infrared heat-based.

## Most-Powerful & Energy-Efficient Red Light Pod

100 mW/cm<sup>2</sup> of red and near-infrared LEDs penetrate sore muscles, joints, deep tissues and nerves to relieve pain and stiffness, while reducing oxidative stress across your entire body.

Shrink unwanted fat cells and produce collagen to promote anti-aging

*"Prism Light Therapy shortened my physical recovery by 4 weeks, I'm back on the field of play."*

## ROI Business Case

Adding Prism Light Pod red light services to your recovery center will generate a substantial new line of incremental revenues.

For example; if your clinic is open 5 days a week from 9am-5pm, you have the capacity of adding 120 light pod sessions per week or 6,240 sessions per year, that's a revenue capacity of \$249,600 of potential incremental annual revenues at \$40 per session.

Here's a revenue and post-tax ROI breakdown based on capacity utilization:

At **100%** utilization: \$249,600 divided by cost of \$13,000\* per year = annual **ROI 192%**

At **75%** utilization: \$187,200 divided by cost of \$13,000\* per year = annual **ROI 144%**

At **50%** utilization: \$124,800 divided by cost of \$13,000\* per year = annual **ROI 96%**

At **25%** utilization: \$62,400 divided by cost of \$13,000\* per year = annual **ROI 48%**

You may finance or lease the pod with zero-down 60-months at approx. \$1500/month and pay off the entire pod within several months. Your light pod will qualify for a section 179 IRS tax deduction of approximately \$5,000 per year \*.

## Q&A

- **Is Prism Light Pod safe and effective?**
- Yes. Prism Light Pod uses non-invasive, non-fluorescent, non-UV rays, and non-infrared heat-based red LED technology. Prism Light Pod has pioneered & perfected whole body photobiomodulation systems for resort spas worldwide.
- **How does it work?**
- Red Light Therapy delivers deep photo-cellular or mitochondrial healing. Clients lay comfortably for 15-minute sessions. The automatic timer turns Prism Light Pod off at the end of each session and the receptionist wipes it down with a disinfectant wipe
- **How much training and administration is required?**
- There is no training required and the Prism Light Pod is automated and 100% unattended. There are six-optimized use-case settings.
