

Elevate Your Business. At a Cellular Level.

The Prism Light Pod and Prism Light Pad combine clinically optimized red light therapy with premium engineering to deliver an elevated whole-body wellness experience.

As the first U.S. manufacturer of whole-body red light therapy systems, Prism has set the standard for innovation, quality, and performance since 2016. Designed and manufactured in the USA, both systems utilize FDA-registered technology to support cellular function, recovery, skin health, and overall well-being. Engineered for wellness centers, medical spas, athletic facilities, and luxury hospitality, Prism solutions integrate seamlessly into existing services while creating scalable revenue opportunities through touchless, automated treatments.

The Prism Light Pod creates a fully immersible experience with whole-body red light therapy integrated with immersive functional music therapy, while the Prism Light Pad offers an adaptable and portable solution that enhances massage, recovery, and wellness treatments, bringing advanced cellular wellness to virtually any environment.
